OBJECTIVE

To secure a full stack web developer position where I can apply my frontend and backend expertise, collaborate with designers to bring UI/UX to life, and build responsive, dynamic websites that meet real-world client needs.

HIGHLIGHTS OF QUALIFICATIONS

- Proficient in HTML5, CSS3, JavaScript; experienced in Vue.js, React, and Bootstrap
 - Hands-on backend development with PHP, Node.js, and Python
 - Experience with MySQL, Firebase, and MongoDB for database integration and CRUD operations
 - Skilled in deploying websites using Git, cPanel, FTP, and managing domain DNS settings
 - Familiar with integrating third-party APIs including payment systems and social media plugins
 - Independent and team-oriented, with strong problem-solving and communication skills
 - Completed commercial and volunteer projects with real clients and published website
-

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript, Python, TypeScript, Java, PHP, Swift
 - **Frameworks/Libraries:** Next.js, Vue.js, React, Node.js, WordPress, Spring Boot, Tomcat, Tailwind CSS
 - **Database & Deployment:** PostgreSQL, MySQL, Firebase, Docker, GitHub, Vercel
 - **Others:** SEO optimization, Git, WordPress customization, Figma
-

PROFESSIONAL EXPERIENCE

Frontend Developer

HKNova, Hong Kong

Jul 2025 – Nov 2025

- Translated UI designs into production-ready Vue.js code for a CRM platform
- Integrated dynamic data via backend APIs and ensured UI/UX consistency
- Deployed new features through GitLab CI/CD and participated in agile workflows
- Participated in agile sprint meetings and implemented new feature updates

IT Intern

China Mobile, Hong Kong

Jan 2023 – Jun 2024

- Developed internal automation tools with Node.js to reduce staff workload
 - Created internal automation tools using Node.js and React
 - Designed a PHP + MySQL project tracking system to streamline task management
-

EDUCATION

Postgraduate Certificate, Mobile Application Development

George Brown College, Toronto, ON

Expected Completion: Dec 2025

Relevant Projects:

- **E-Commerce App** – Built a full-stack shopping platform using Firebase and React Native
- **Mobile App Design** – Prototyped and implemented app UI using Kotlin, Swift, and Figma

Bachelor of Science in Computing

The Hong Kong Polytechnic University, Hong Kong

Jul 2022 – Jul 2024

Relevant Projects:

- **Full-stack Web Application** – Developed a database-driven business management dashboard using PHP, JavaScript, and MySQL
 - **E-commerce System** – Created a shopping cart system and order management feature with user authentication
-

VOLUNTEER EXPERIENCE

- Built "[*My Bagel*](#)," a bakery e-commerce website for a friend, using modern web technologies
- Created a wine-themed online shop frontend as a personal learning and support initiative

STEM Workshop Instructor

- Taught programming basics with Scratch to elementary school students
 - Guided students in building interactive games, fostering logic and creativity
-
